Clario Respiratory Solutions

Improve data quality and breathe easy
in your clinical trials

CLARIO.

Improve the quality of your respiratory trial data

Clario is committed to meeting the challenge of managing and generating high quality respiratory data in clinical trials. We tackle complex protocols, lack of training, and collection and analysis inconsistencies to create certainty about patient eligibility, safety and compound efficacy.

To build greater confidence in the quality of your respiratory data to remove any uncertainty about the accuracy and acceptability of data, learn how Clario can help. Our centralized spirometry and other pulmonary function tests (PFTs) have become irreplaceable diagnostic, screening and data collection tools for pulmonary and other lung safety or disease progression clinical trials.
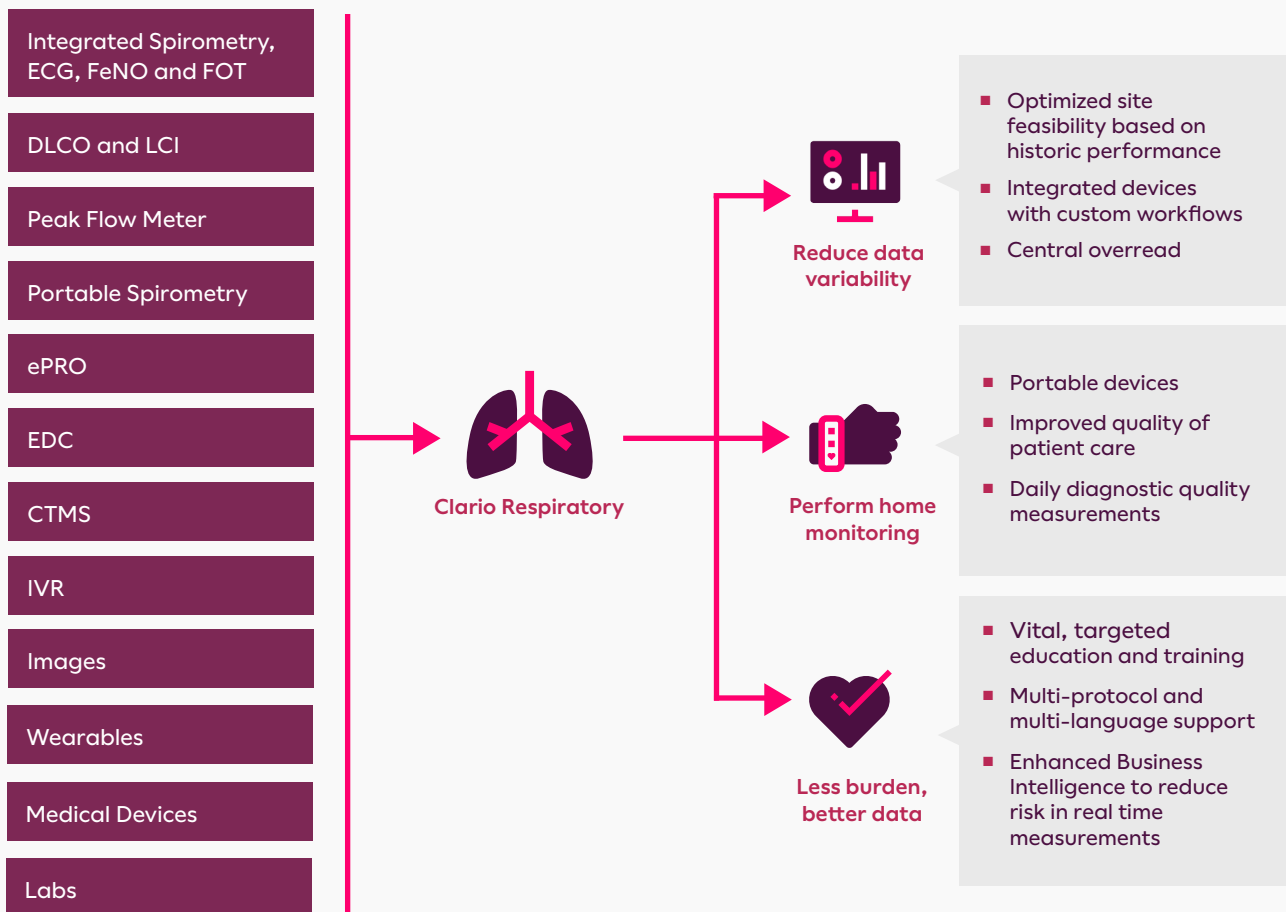

Proven solutions for centralized spirometry and PFT

With diagnostic spirometry and PFT, you can optimize pulmonary function data quality for better patient and site performance, increased protocol compliance and reduced investigative site burden. But with so many solutions available, how do you know what's right for your trial?
Our respiratory solutions apply leading technology, unrivalled expertise, global resources and a centralized, custom approach to your indication and protocol to deliver the highest quality data for your global clinical trials. With over 200 therapeutic area experts, our solutions are custom-built for your patients, indications, and clinical trial objectives.

Clario Respiratory: centralized approach for high-quality data

Reduce data variability and integrate home monitoring solutions for less burden on sites and better data

Integrated Spirometry, ECG, FeNO and FOT

DLCO and LCI

Peak Flow Meter

Portable Spirometry

ePRO

EDC

CTMS

IVR

Images

Wearables

Medical Devices

Labs

Clario Respiratory

Reduce data variability
- Optimized site feasibility based on historic performance
- Integrated devices with custom workflows
- Central overread

Perform home monitoring
- Portable devices
- Improved quality of patient care
- Daily diagnostic quality measurements

Less burden, better data
- Vital, targeted education and training
- Multi-protocol and multi-language support
- Enhanced Business Intelligence to reduce risk in real time measurements

Expect up to 25% unacceptable data from investigator sites with a decentralized study

Improve respiratory data quality with active indication management

Leverage our indication insights to drive high-quality data and increase speed-to-market with our integrated solutions.

Select the right sites

Optimize your site feasibility guided by historic performance in data quality and active recruitment in your indication.

Control workflows for compliance and quality results

Software customization and integrated devices that exceed ATS/ERS guidelines help you enforce standards and protocols.

Reduce site variability and burden

Critical training ensures sites understand objectives and maximizes first-time quality, with technology and global support to keep sites happy. We offer 24/7 live patient support.

Capture nearly 100% acceptable data and increase statistical power

Central overread with quality, acceptability and best test reviews reinforces best practices and alerts sites to ensure high data quality and lower costs.
Identify and mitigate risks in real time

Centralized visibility of site performance and subject outlier data so you can recognize and minimize the risk of poor data quality.

Clario supported 80% of recent respiratory drug approvals

Clario has also supported:

- **1,000+** Respiratory Trials
- **68K+** Respiratory Sites
- **500K+** Respiratory Patients
- **90%+** New Respiratory Drug Approvals
- **220M+** Flow-Volume Loops Analyzed
- **93** Countries
- **105** Languages
